How Authorities Use eFTI

Roles and Responsibilities and Benefits Explained

Annukka Elonen, eFTI Contact Point of Finland

TRAFICOM
Finnish Transport and Communications Agency

Lukas Lund Ujvári, eFTI Contact Point of Denmark

Trafikstyrelsen
Danish Civil Aviation and Railway Authority

Nordic Joint eFTI Gate

Jan 2025

Feasibility study on shared implementation

- Legal and architectural opportunities;
- Organisational and governance models for cooperation;
- Proposal of a partnership model with next steps.

Aug 2025

Launch of Joint eFTI Gate Agreement Negotiations

- FI, SE, DK and NO joined the negotiations
- Coordination with the Baltic Sea Region transport corridors
- First draft of the agreement in September 2025

March 2026

Finalizing the negotiations

- Finalizing the agreement
- Launch of the Technical Expert Group

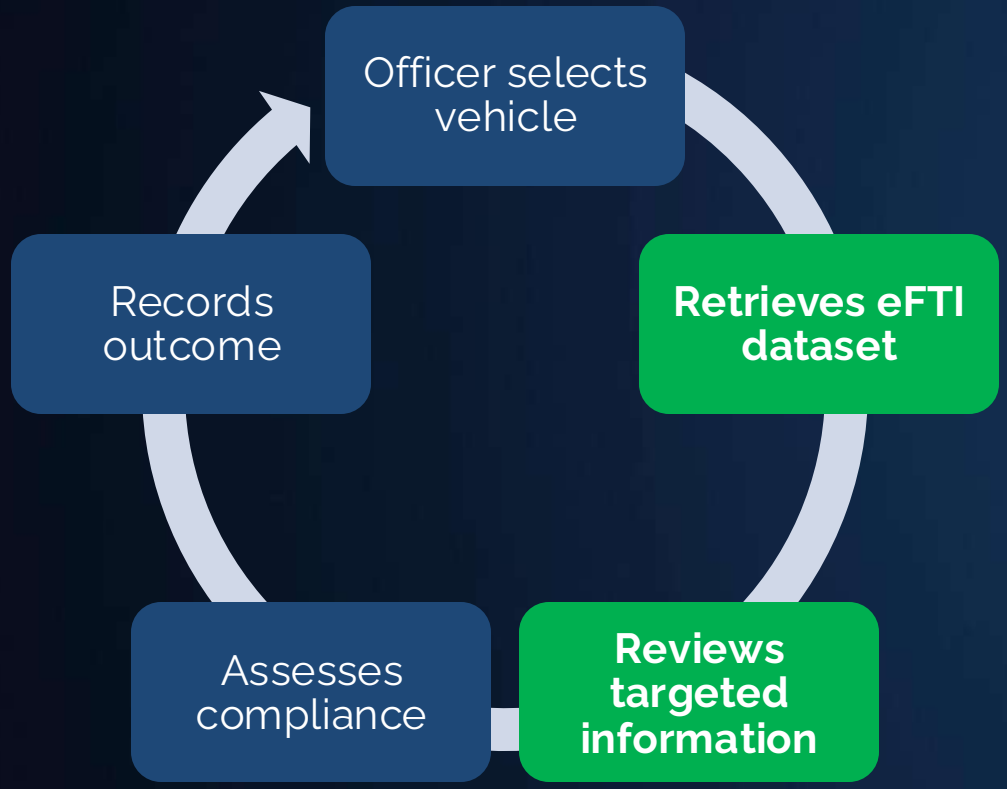

October 2026

Signing the agreement and building readiness for go live on July 2027

Key Challenges for Authorities in eFTI Adoption

No eFTI platforms. No data. No benefits.

Creating high-quality eFTI data at scale.

Delivering the right data to the right officer at the right time.

Co-funded by
the European Union

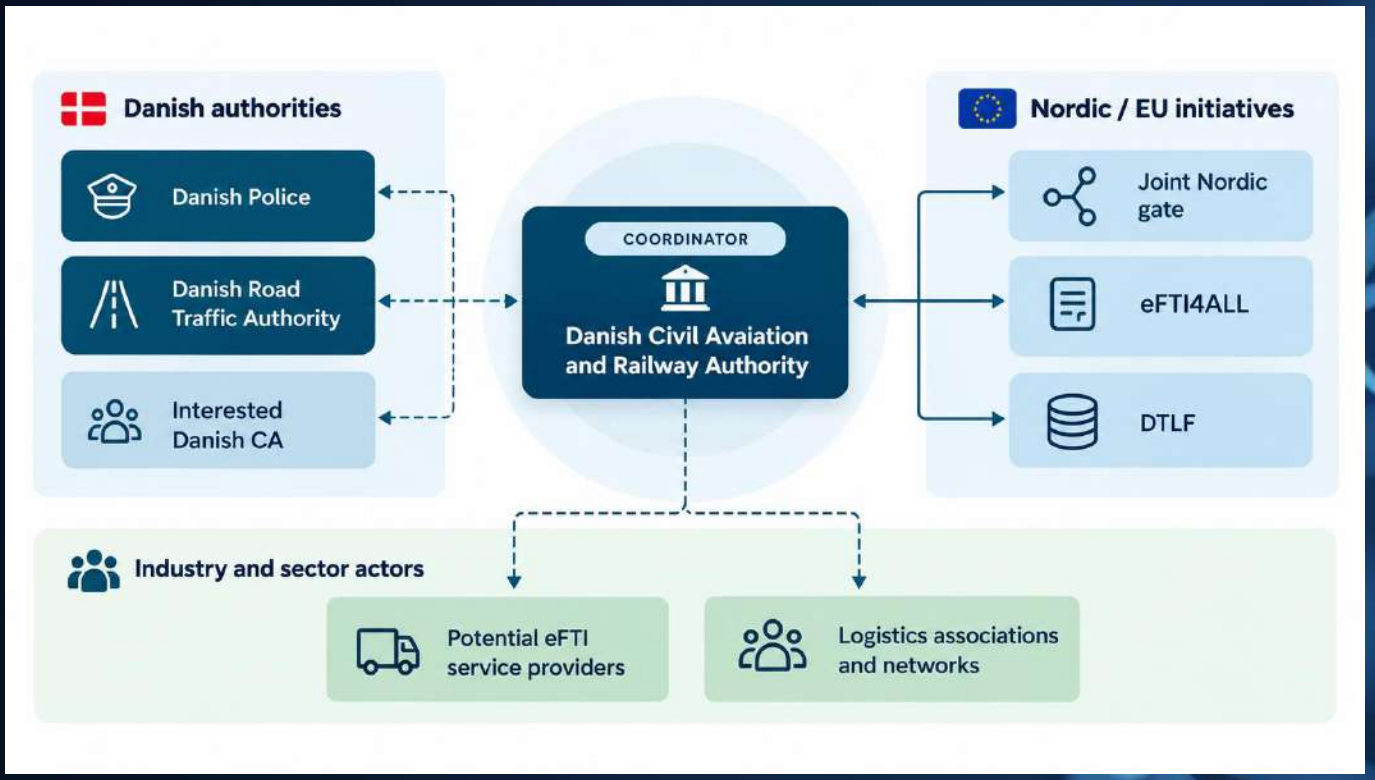

What we have learned during implementation

1. eFTI4Authorities → Better Data. Better Targeting. Better Enforcement.
2. Key regulatory and technical components are still maturing.
3. Joint problem solving is essential.

The challenge is leading regulation, technology and implementation readiness progress ***together.***

Roles: the Danish eFTI Ecosystem

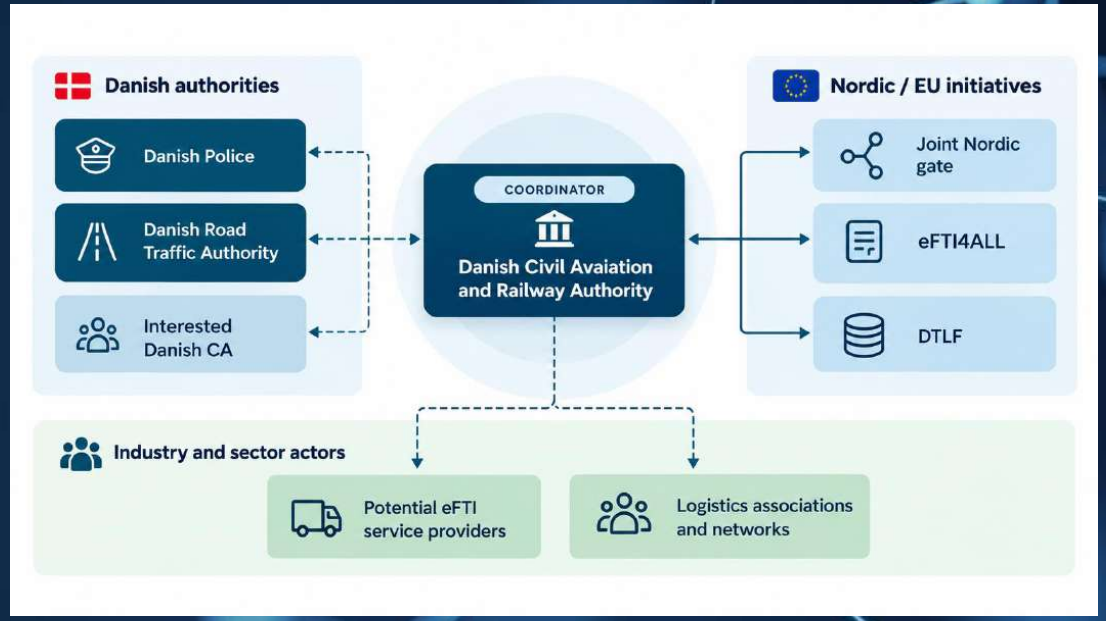

Co-funded by the European Union

Responsibilities: Needs and arcitecture

Define the authority needs
Be clear about what authorities need eFTI for and which control processes it should support.

Identify opportunities for cooperation
Explore where authorities can share solutions, approaches and infrastructure.

Understand architectural differences
Authorities may have different system landscapes and architectures.

Co-funded by the European Union

Benefits: Nordic eFTI desktop exercise

Purpose
- Explore how eFTI could work in practice
- Identify needs, benefits, risks and pain points

Concept
- A desktop exercise using practical scenarios
- Physical maps and data
- Representatives from the whole ecosystem

Results
- Deep dive into small (but important) details
- Knowledge sharing
- Established priorities and technical groundwork

Co-funded by the European Union

Benefits: and how to realize them

Processes and workflows
A clear understanding of existing processes and workflows is needed to identify where eFTI can provide real benefits.

From paper to digital
Consider how the change from paper to digital affects how information should be structured, presented and accessed.

Systems and hardware
Consider how eFTI can fit into existing systems and what hardware is needed to support its practical use.
