Session: eFTI & friends: other initiatives related with eFTI, eCMR, eDelivery

Antoine Joly-Battaglini
AVP Product @ Shippeo

Introduction

Shippeo

Shippeo is the global leader in real-time transportation visibility. We deliver the most accurate, SLA-backed data on the market - plus the AI-powered workflows to turn that visibility into automated action across your entire supply chain.

Open Logistic Foundation (OLF)

- Non-profit and common benefit **foundation** established in **2021**
- **60+** members across **18+ countries**
- **Neutral partner** for cooperation
- Focusing on **joint implementations**

SHIPPEO

open logistics foundation

For shippers
Connect different carrier **ecosystems** without building one-off integrations each time.
For carriers
Use their **existing TMS**, eCMR or driver tools rather than adopting a separate system for every customer.
Interoperability
Every stakeholder connected in their own system
For authorities
Receive **consistent, trusted information** through the eFTI framework.
Smooth adoption by the actors on the ground is key for the success of eFTI regulation.

Open standards are the mechanism to achieve interoperability

Without open standards

- One-off integrations
- Platform dependency
- Repeated implementation effort
- Fragmented adoption

With open standards

- Common data structures & semantics
- Standardized interfaces for fast scaling
- Consistent signing & document verification
- Connect platforms without vendor lock-in

SHIPPEO

open logistics foundation

Unlocking impactful open standards

OLF's community provides the perfect setting

1 They develop open source solutions and projects.

2 They are an interactive and diverse community.

3 They provide a neutral space for collaboration.

open logistics foundation

What makes the OLF standard for eCMR special?

✓ Open and free

Available for any company to download, use, and adapt – no costs, no restrictions, and vendor-free.

✓ Collaboratively developed

Built with 25+ logistics and IT partners of all sizes, ensuring compatibility and the evolution of a de facto standard.

✓ Industry-ready and easy to implement

Can be integrated into existing IT systems, and external IT support is available if needed.

✓ Continuously improved

Regular updates and community feedback help long-term reliability.

open logistics foundation

Interoperability & open standards within existing platform products

Document lifecycle

Create · Sign · Store · Retrieve · Audit.

Connected data

Documents tied to live shipments.

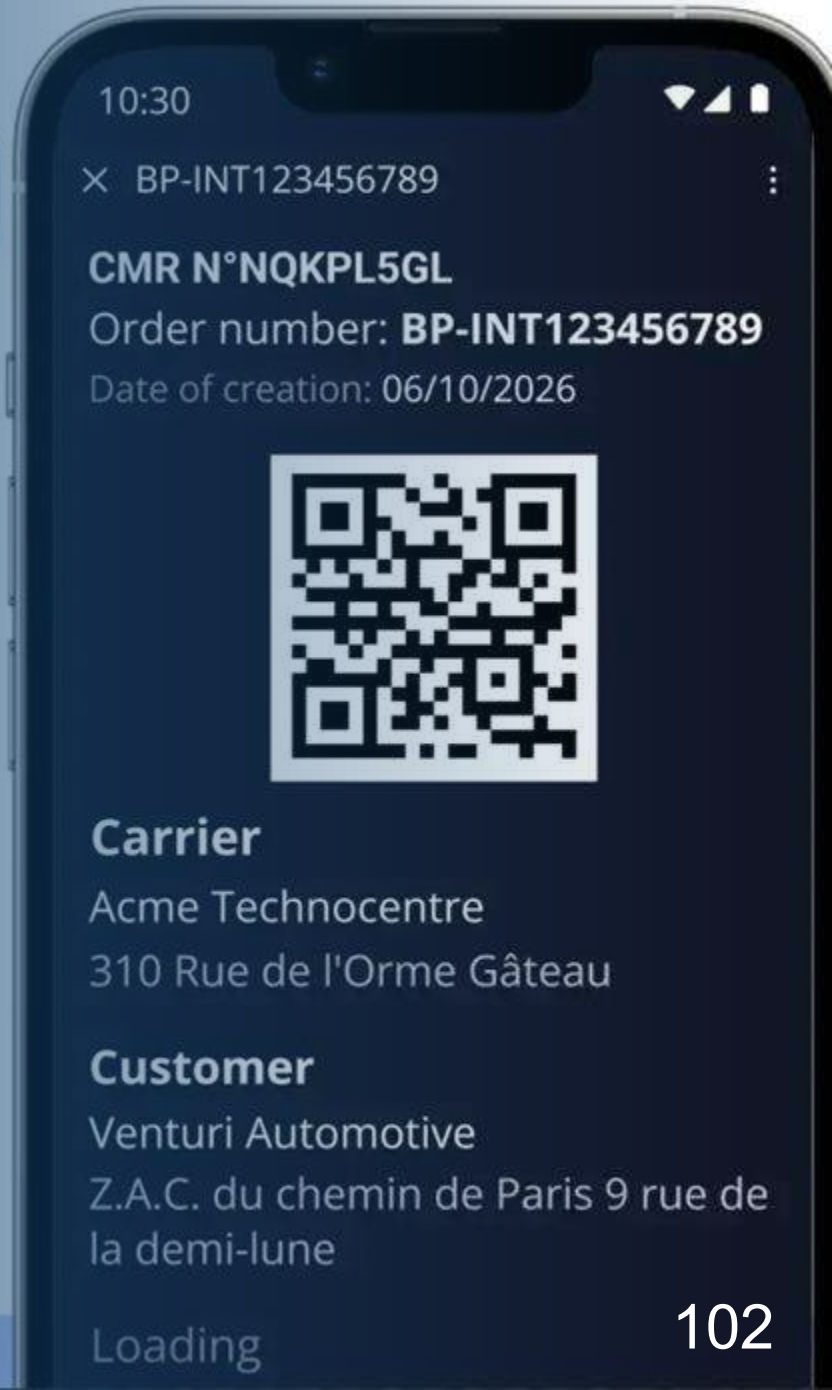

Ecosystem reach

Mobile · API · Portal · Link · QR · E-Gate.

Interoperability

TMS · ERP · external eCMR. No rip-and-replace.

OLF eCMR open source solution offers bricks that can be used individually or all at once.
