Agenda

- Welcome exercise
- Introduction – Lasse Nykänen
- eFTI platform TMS demo – Oguz-Kaan Öztürk
- Discussion session – All
- Conclusion – Karl Strack
- Session feedback – Lasse Nykänen

Co-funded by the European Union

Ask questions during the session!

eFTI data exchange system

- eFTI is a Europe-wide common data standard and framework for the electronic exchange of freight information between authorities and economic operators, that ensures smooth interoperability between eFTI Platforms and eFTI Gates.
- eFTI Gate – an intermediary between the eFTI Platforms and the Competent Authorities
  - eFTI Gates are connected EU-wide
- eFTI Platform – an operating system, environment or database intended to be used for the processing and storing of eFTI data
  - Needs to be certified

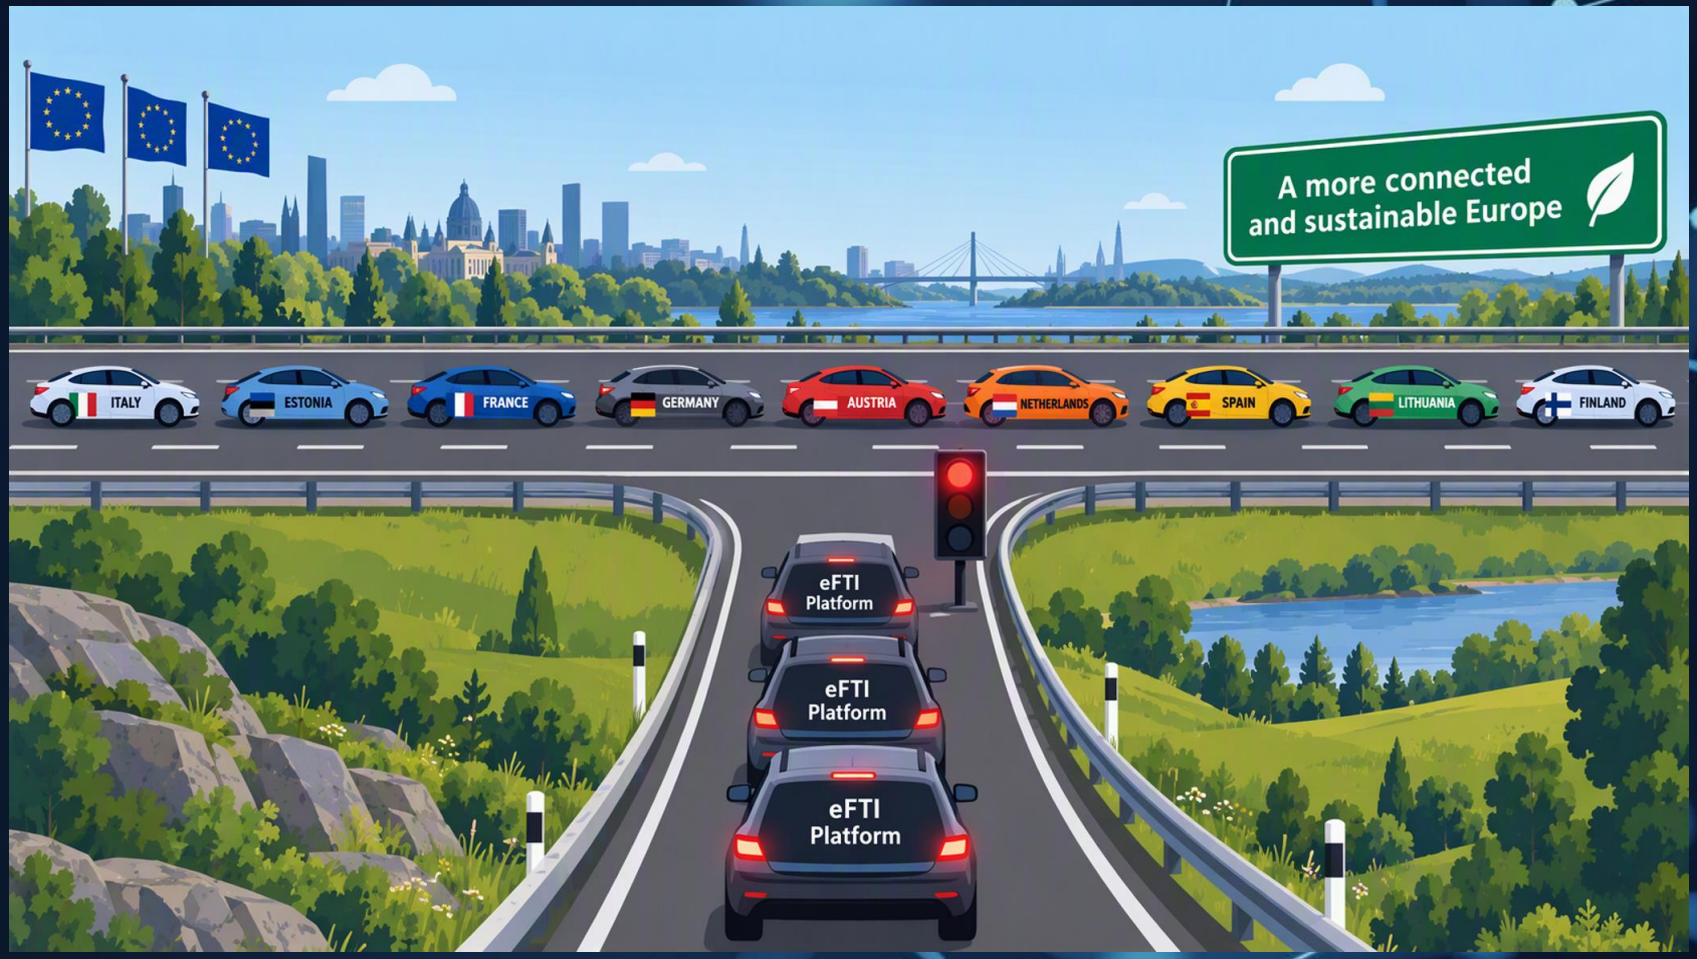

Co-funded by the European Union

www.efti4all.eu

A bit more than 1/3 of EU Member States are soon ready for wider integration, while 1/3 are in procurement process and rest are unknown or have not started yet.

For platforms we are waiting final decisions about the certification and onboarding process.

Q&A

1. How mature is your digital infrastructure environment today?
    - PDFs, data flowing between subsystems, we are fully digitalized
2. What would convince your company to invest in eFTI integration?
3. Which kind of deployment models we have for eFTI platforms?
4. How eFTI should be integrated to my existing ICT environments?
5. Beyond regulatory compliance, what new business value could eFTI create?

Q&A

1. Can eCMR and eFTI platforms be connected?
2. Who should control access rights to transport information in the eFTI ecosystem?
3. How to ensure security and data sovereignty between stakeholders, when integrating eFTI platform to tributary systems?
4. What would make eFTI integration a "no-brainer" for your company?

Feedback

- Did the session meet your expectations?
- Which topics you would like to discuss more?
- Were we able to increase your eFTI awareness?
